SIMPLE IDEAS, BEAUTIFULLY EXECUTED

The willowlamp success story began with a single simple idea: the willowlamp notch system that allows curtains of ball-chain to flow elegantly from laser-cut steel frames. Today, our award-winning, cutting-edge designs bring life and light to large and small spaces all over the world.

Our original lighting designs are shaped by the principles of sacred geometry and built with world-class lighting technology, craftsmanship and superior materials to create timeless yet functional works of art.

When you invest in a willowlamp, it will be a true investment in style, creativity and individual expression.

The Southern Flame for Southern Guild 2018

ADAM HOETS - FOUNDER AND CREATIVE DIRECTOR

Adam Hoets is the founder and creative director of willowlamp. He is inspired by nature's sculptural forms. His designs are imbued with the beauty he sees everywhere.

His obsessive understanding of each design results in beautiful products that combine aesthetics and technical detail with a consistent quality found in every willowlamp, from the most breath-taking chandelier to a table lamp that is perfectly subtle in its simplicity.

Adam graduated as an architect from the University of Cape Town in 2000 and later specialised in designing sustainable buildings that integrate harmoniously into their surroundings with sculptural forms. Adam lives and works on the slopes of Table Mountain in Cape Town.

willowlamp is the next chapter in his journey as an artist and designer.

CHANDELIERS AND WALL SCONCES

For the 99 percent of the time we've been on Earth, we were hunters and gatherers, our lives dependent on knowing the fine, small details of our world. Deep inside, we still have a longing to be reconnected with the nature that shaped our imagination, our language, our song and dance, our sense of the divine. Janine M. Benyus

FLOWER OF LIFE

Sacred geometry is the expression of geometry related to the evolution of consciousness, mind, body, and spirit in geometric terms. True sacred geometry is not just static angular forms. It is organic and living - it is in constant evolution (transcendence) or devolution (materialisation), ascending or descending from one form to another.
